Ultra-Fast Toasting Performance

Hamilton Beach[®] Commercial Heavy-Duty Toasters are designed for top performance. With ultra-fast output they toast up to 480 slices per hour. This produces a faster flow through for food service operators and customers. Both toasters are equipped with ceramic elements that radiate heat uniformly and guides that center the bread, resulting in consistent, even toasting.

With ceramic elements that resist wear and damage for a long life and a magnet-based bread lifter with fewer moving parts, durability is another reason to add these toasters to your business. The heavy-duty, stainless steel exterior will stand up to the busiest of food service applications.

Other features include bread to bagel switch for maximum toasting versatility and convenience and a cancel button that lets operators stop toasting anytime. For safety, the toaster shuts off automatically, even if toast is jammed.

KEY FEATURES

Ultra-Fast, Excellent Results - Ceramic elements heat evenly and quickly for toasting output of 400 slices an hour (HTS450) and 480 slices (HTS455). Guides center bread, holding it upright for even toasting.

Bread/Bagel Bun Flexibility - Operators can choose preferred setting. Bagel/bun setting toasts the cut side and warms the other.

Reliability - Magnet-based bread lifter with fewer moving parts reduces wear and tear. Ceramic elements resist wear and damage for long life.

Safety Features - Toaster shuts off automatically, even if toast is jammed. Cancel button lets operators stop cycle anytime.

Solid-State Temperature Sensor - Automatically adjusts toast time for consistent results.

Warranty - 1 year parts & labor. Covered under the Express Care Service Program. See web site for details.
