

12 Cup Dispensing Coffeemaker

D43012B

The Commercial Dispensing Coffeemaker is different in all the right ways. It dispenses coffee directly into the mug, so there's no ca rafe, no pouring, and no spills. It keeps coffee hot and fresh so there's no more bitter flavor. And while it's a different way to serve and enjoy great-tasting coffee, it's still just as easy to make. It's everything a coffee drinker could possibly want:

- One-hand dispensing means no messy pouring or glass breakage
- Enclosed brewing system makes coffee under optimal conditions
- Thermal insulation and gentle warming heater maintain coffee's temperature for fresh flavor with no bitterness
- No hot plate to scorch coffee flavor
- Easy-to-use design lets consumers make coffee the way they always have
- 2 hour automatic shutoff
- Commercial UL with 3-prong cord
